

Interference Between Image Borders & Paragraph Borders

This document is provided to give a working copy of a bug as reported in [Python3docs Bugs #3](#). This bug is as follows:-

The bottom border of an image-in-frame-with-caption will coalesce with the top inline-border of a paragraph. In other words, the below-paragraph spacing of an image will be added to the internal top-spacing of the next paragraph, rather than being placed between the two entity's borders.

To produce this document the following steps were taken:

- (a) The styles from [chapter_01.odt](#) were loaded into this document under LO 24.8.3.2
- (b) The image+caption "*Figure-01.1: idle's Python Shell*" were copied from [chapter_01.odt](#) into this document.
- (c) A "Code Box 2" was copied into the document below the image

Example:

```

Python Shell
File Edit Shell Debug Options Windows Help
>>> import SortedDict
>>> file_sizes = SortedDict.SortedDict(key=lambda x: x.lower())
>>> for name in os.listdir("."):
>>>     file_sizes[name] = os.path.getsize(name)

>>> len(file_sizes)
205
>>> print(file_sizes)
